About the Expo

India's aquaculture, under one roof.

AquaXPO 2026 is a two-day trade expo and conference that brings together the people who grow, feed, protect and power India's fish and shrimp farming. Hosted in Baleshwar, Odisha, it connects farmers with the suppliers, technologies and buyers that move their business forward, with a national audience in view.

Who should attend

Fish and shrimp farmers

Hatchery and nursery operators

Feed manufacturers and dealers

Aqua-health and diagnostics companies

Technology and equipment providers

Exporters, processors and buyers

Researchers, institutions and students

Government departments, banks and financiers

Why Balasore (Baleshwar)

Baleshwar sits in coastal northern Odisha, a state with a long coastline and plentiful inland waters. That makes it a natural meeting point for farmers and aquaculture businesses in the region, while a national base of exhibitors and visitors turns the expo into a platform for the whole country.

Why exhibit:

- Meet farmers, dealers and buyers face to face
- Launch and demonstrate products live
- Build dealer and distributor networks in eastern India
- Take part in the technical sessions alongside the exhibition

Focus areas

Four focus areas. One growing industry

Feed

Nutrition that drives growth and margins

Feed manufacturers, additives and probiotics, feed management tools, alternative proteins

Health

Healthier stock, safer harvests

Medicine, Diagnostics and labs, biosecurity solutions, water-quality testing, aqua-health advisory

Hatchery & Farming

Better seed, better ponds, better yields

Seed and hatcheries, pond and cage systems, aerators and equipment, harvest and post-harvest solutions

Technology

Smart farms are the future

Water-monitoring sensors, automatic feeders, farm-management apps, technologies and traceability, innovations

Program and contact

Two days. One packed program.

Day
1
15
December
